Gather new work experience and grow within our DevOps experts team

**Develop:**  
Get hands-on experience on state-of-the-art Cloud technologies

**Have fun:**  
Beat your colleagues at darts and help benchmarking Augustiner vs. Tegernseer

### About Neos

Neos is a Cloud-, Infrastructure- and Service Provider, specialised in building customised Digital Platforms across all industries. We offer a full range of solutions around Big Data, DevOps and Software Defined Data Centers, including Infrastructure and Application Management, Cloud Infrastructure Enablement and application development platforms.

### What we offer

An exciting and stimulating position in a dynamic, fast growing and multi-cultural IT company. You will have the opportunity to develop yourself and your career, working in multiple areas in a fun relaxed, professional environment. You will also have the opportunity to be innovative and think 'outside of the box'.

You at Neos

As a DevOps engineer you will work alongside our cross-functional IT teams, using your experience in development and automation to facilitate the use of Infrastructure as Code and CI/CD pipelines in the build of operational components. Your daily tasks will include:

- Participate in evolving our build, deployment, and release management practices towards a continuous integration/continuous deployment model
- Work on internal development projects
- Support day-to-day operations of platforms and debug issues
- Ensure a standardized and stable Neos IT Infrastructure

# Your Profile

## You are:

- M/F/D (We don't actually care as long as you're human)
- A critical thinker with structured problem solving skills
- Independent and not afraid to take ownership of projects/issues
- A strong team player that can work in geographically dispersed teams
- Quick & willing learner of new technologies

## Professional experience:

Solid background (5+ years) in Linux administration

## Required skill set:

- Strong working knowledge of Infrastructure automation (Terraform/Ansible)
- Programming experience (Python/PHP OOP)
- Experience with CI/CD pipelines (Jenkins/Gitlab)
- In-depth knowledge of the AWS platform
- Fluent verbal and written English

## Nice to have:

- RHCE certification (RHEL 7)
- Working knowledge of Docker/Kubernetes
- Working knowledge of ELK stack
- Additional Public cloud experience (Azure/GCP)
- Experience with industry security standards (PCIDSS or ISO27001)

**If you believe you are the right person, please send your application via e-mail to Julia Häge!**
