

We're looking for an
Azure Cloud Engineer (m/f/d)
to support our Team in Bangkok or remotely

About Neos

Neos IT Services is a leading technology advisor to companies relying on business critical platforms. Neos is a partner to major enterprises delivering digitization roadmaps, automated cloud infrastructure, application development platforms and Big Data platform optimization. With approximately 90 professional staff, Neos offers a full range of IT solution architecture including migration to Cloud, Big Data, DevOps and Security.

Principal Tasks

As a member of the global operations team your key focus areas will be:

- Customer communication
- Deploying Azure services
- Azure architecture & infrastructure
- Microsoft 365 migration & operation
- Azure Virtual Desktop
- Coaching team members occasionally
- Azure Coding (DevOps) - would be a "nice to have"

Further responsibilities:

- Be first customer point of contact for new requirements and escalations
- Deploy and implement Azure and Microsoft 365 solutions including planning, migration and maintenance support
- Perform migrations from existing environments to Azure or Microsoft 365
- Develop infrastructure as a code using templates and DevOps on Azure
- Document operational handbooks
- Troubleshoot and perform root cause analysis when incidents occur
- Perform technical testing, proof of concept, pre-sales activities, products research and advisory to teams and customers
- Occasionally coach your team members from both remotely and on site who will support you in the projects
- Provide support to Sales team and solution presentations to customers if needed

Your Profile

Academic background:

- Bachelor's degree in Computer Engineering/Computer Science/Information Technology

Professional Experience:

- About 3-5 years of working experience in Senior Windows Engineering or Azure Cloud roles

Required skill set:

- Excellent English communication skills (Thai or German is a plus) and very good interpersonal skills
- Strong knowledge of Azure and Microsoft 365 services
- Strong knowledge of building solutions and deploying infrastructure in the cloud such as virtual machine, virtual network, scripting
- Practical knowledge and skills in infrastructure as code and infrastructure definition tools e.g. PowerShell, Azure ARM, YAML/JSON
- Good knowledge of Microsoft 365, Office 365, Enterprise Mobility and Security (EMS) e.g. Exchange Online, SharePoint Online, Azure Active Directory and Intune
- Working experience with Windows Server and endpoint technologies
- Working experience in monitoring, backup/recovery preferably with cloud solutions
- Working experience in Azure Virtual Desktop is a plus
- Working experience in cloud governance such as policy, compliance and security
- Strong analytical skills and solid understanding of production support processes
- Good documentation skills
- Some of the following exams would be preferred:
 - o AZ-104: Microsoft Azure Administrator
 - o AZ-303/304: Azure Solutions Architect Expert
